ABOUT US MILESTONE

GUOCERA : LET'S REIMAGINE

With over 50 years of manufacturing experience, GUOCERA, a member of Hong Leong Group has proudly become the tile brand of choice in over 50 countries, from Asia-Pacific and Middle East to Europe and America.

Whether it's residential, commercial space, or public infrastructure, you can find Guocera inspired spaces the world over. Guocera helps to create inspirational environments in which people can live, work and play.

It is our aspiration to become and remain a global player through continuous value creation and innovation for our business partners and consumers.

COMMITMENT TO GREEN

We are a green certified company, where our innovation and expertise combined producing trendsetting tiles in minimum-waste manufacturing process.

QUALITY ASSURANCE

Comprehensive analysis and testing of raw materials are conducted according to stringent measures, resulting in unmistakable quality and reliability that are the hallmarks of Guocera tiles.

NEW PRODUCT DEVELOPMENT

We are more than just manufacturing. Our ethos includes understanding our consumer preference and design trend. We help people express themselves and reimagine spaces of wellbeing that bring joy.

DIGITAL TRANSFORMATION

Embrace digital technology in production and every aspect of marketing to enhance consumer buying experience and needs.

Awarded 'The BrandLaureate Most Valuable Brand Awards' 2016-2017 for brand excellence by The Asia Pacific Brands Foundation (APBF)

2017

Voted the Malaysia's Gold in the highly competitive category of Floor & Wall Tiles as judged by Malaysians in the 2017 Reader's Digest Malaysia Trusted Brands

BRAND ARCHITECTURE

BRAND VISION

At Guocera, we believe that wall and floor coverings hold the key to transform spaces. That's the worthy work that we do as 'IMAGINEERS', helping people reimagine the possibilities of their lifestyle spaces.

VERTICAS

Contemporary vertical architectural slab for modern interior decoration. The large-format porcelain bring elegance to any space.

GUOCERA

Collections of porcelain and technical porcelain which are carried in four interior themes aims to cater various unique consumers preferences & lifestyle.

SOLARE

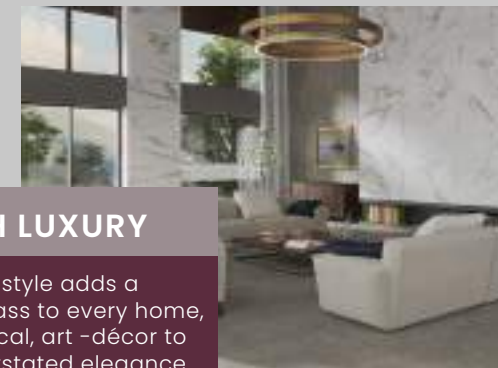

Simple yet modern designs in trendy colours. Designed and manufactured by Guocera that appeal to the market as a whole.

INTERIOR DESIGN THEME

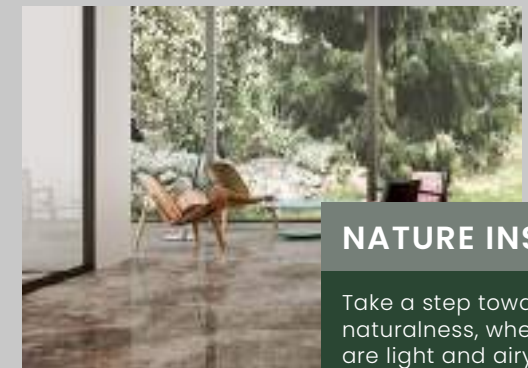

STYLISH LUXURY

The design style adds a touch of class to every home, from classical, art -d cor to sleek understated elegance of today.

NATURE INSPIRED

Take a step towards naturalness, where spaces are light and airy.

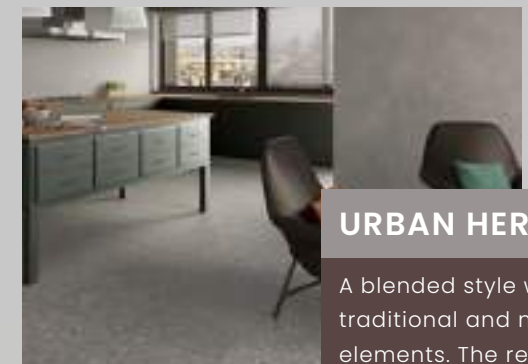

MODERN SCANDI

A refined simplicity meets comfort and functionality

URBAN HERITAGE

A blended style with traditional and modern elements. The retro and mid-century modern pieces never go out of style.

CRAFTED DESIGN

SPECIAL PIECES

Beyond and electrifying range of design styles, colours and textures, the INMAGINE Special cuts collections offers wider possibilities to add texture and detail for a more sophisticated space.

ORIGIN OF MATERIAL

Intensive research and observation led us to admire the imperfect beauty of origin of materials of stones, marbles and terrazo stones. "Special attention to fine details such as textures, colour nuances and gradients"

TECH TILE

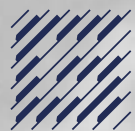

Superior Diamond Surface for technical porcelain, characterised by its excellent resistance to scratch, anti-slip and easy maintenance. Perfect for outdoor and high traffic applications.

CRYSTALIZED VEINS

"Crystalized veins" are the special effects created to imitate nature's feature of a crystalized minerals and sparkling look in veins found in most marbles or natural stones. A soft or deep wispy shiny veins of natural effects in tiles.

V1

UNIFORM APPREANCE

Tiles have uniform shade and texture with low, minimal variation.

V2

SLIGHT VARIATION

Tiles have slight variaton in shade and texture.

V3

MODERATE VARIATION

Tiles have moderate variation in shade and texture.

V4

RANDOM VARIATION

Tiles have random and substantial in shade and texture such that any piece of the may be totally different in shade to another tile.

*As a result of firing, shade variation is an inherent property in ceramic tiles. Therefore, slight variations from the standard colour texture may be unavoidable.

INSTALLATIONGUIDE

Handling and storage

- Tiles should always be checked upon delivery. Ensure that the specifications are as ordered.

If supplied in batches, the shades and sizes should be checked prior to installation to avoid mixing during installation.

Pallet of tiles should be stored in a proper covered and dry area and on a firm and level ground.

It is recommended to do a 'dry lay' before tiling to check and confirm the specified quality of the supplied tiles.

Fixing of the tiles

- Porcelain tiles with its low water absorption should be fixed with a C2 adhesive to achieve an effective and long-lasting bond.
- The use of cement-sand mortar, either wholly or partially mixed with adhesive may affect the bonding of the installed tiles and is therefore not recommended.

- Instructions on adhesive application and installation procedures should be strictly followed to get the best results.
- The substrate receiving the tiles should be free of loose particles, grease, old paints, etc, for the adhesive system to perform effectively.
- Tiling work should be carried out in accordance to Code Of Practice for the Installation of Ceramic Tiles.

- The adhesive should be applied on the substrate using a trowel with the correct notch size (at least 10 mm for large format tiles) to get a good contact distribution of the adhesive.
- Coverage of the adhesive coat to the tile back should be maximized by back buttering on the tiles with a scratch coat.
- The recommended installation gap for large format size of tiles should not be less than 3 mm.

- Tile installations with butt-joints or insufficient gaps may be susceptible to post-installation failure risks. A minimum installation gap of 5mm is recommended in areas exposed to direct sunlight.
- As an industrial guide, expansion joints should be incorporated as follows:

Internal installations: every 5 to 10 m.

External installations: every 3 to 5 m.

Parameter joints should be incorporated for all installations.
- To prevent the effect of lippage on installed tiles, the following are recommended:

(i) Installing the tiles following the same directional orientation of the tiles.

(ii) Use of levelling system to even out the tiles during tiling (Fig. 1)

(iii) Use a running bond offset of 85:15 pattern for large format rectangular tiles with a joint width of minimum 4 mm (Fig. 2).

Fig. 1

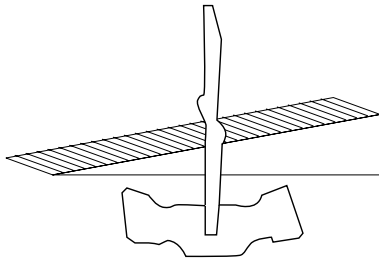

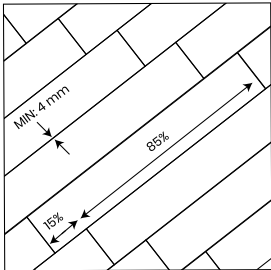

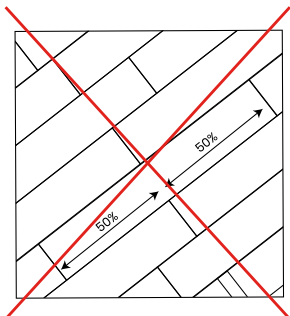

Fig. 2

Recomended laying pattern

Avoid 50:50 offset pattern

CLEANING AFTER LAYING

- A good initial cleaning should be done on completion of the tiling work. To remove the cement and grout residue, a cement/grout cleaner should be used.
- For installations with epoxy or resin grouts, a suitable epoxy cleaner should be used.

Protection

- Tiling work should be protected from moisture (if exposed) for at least two weeks until the bedding and joints have set and hardened.
- Completed floor tiling should not be subjected to any traffic for at least four days. Light pedestrian traffic should be allowed after four days but heavier traffic should only be permitted after 14 days.
- The completed flooring should be protected using appropriate breathable sheets or kraft paper to prevent staining and damages. Plastic sheets may not be suitable for this purpose as it may induce sweating (condensation) and discoloration by restricting the grout and bedding material to dry properly.
- Covering of the floor should be done when the floor is completely dried.
- Plywood sheets should be used if heavy loads are to be moved on the tiled floor.

Cleaning and maintenance

- Many general-purpose cleaners that are readily available are acceptable for use on tiles. It is also important that the tile receives a thorough rinsing with clean water after the cleaning process has been completed.
- On large commercial floors where buffing machine are used, the correct choice of cleaning pad is important to ensure delicate tile surfaces like polished tiles are not damaged.
- The frequency and timing of any maintenance regime is dependent on the specific characteristics of each tile application. Factors such as traffic, environmental conditions, surface texture of the tiles and product type should be considered when planning the schedule of the maintenance.

Cleaning guide

Category	Type of stain:	Cleaning recomendation
CEMENTITIOUS MATERIAL	Cement/grout residue	Acidic Cleaner
FOOD	Beer, wine, coffee stains, soy sauce, ketchup, coffee, tea, food colouring	Alkaline Cleaner
OIL & GREASE	Food oil, engine oil	Alkaline Cleaner
INK & PAINT	Marker ink, paints, latex	Alkaline Cleaner or Solvents, eg. Thinner, Turpentine
OTHERS	Rubber, footwear stain	Alkaline Cleaner
	Metal, rust stain	Acidic Cleaner
